### **BIOLOGICAL APPROACH IN INTERDISCIPLINARY TREATMENT**

Trauma and delayed treatment causes complicated problems. Rehabilitation of the lost tissues and the defect formed becomes difficult and interdisciplinary treatment approach becomes a necessity. Biological approach provides optimized tissue regeneration and facilitates minimally invasive applications. In this presentation crucial key points of treatment planning regarding orthodontics, periodontics and restorative treatment with customized interdisciplinary hierarchy will be discussed.

### **CV**

Dr. Enver Yetkiner completed his PhD degree at Ege University, Izmir in 2009. He served as a guest researcher at Universitaet Zurich between 2011-2013, and at Oklahoma University in 2016. He has been appointed as Dean at Izmir Tınaztepe University in 2021. Interdisciplinary treatment is among his Professional interests.
